

Contract Guardian Services

We include our consulting services to help configure Contract Guardian to achieve your objectives. Implementation processes range from simple to complex, depending on the scope of business needs. Generally speaking, our cloud based delivery model for Contract Management offers compelling advantages. Implementation tasks and time to deploy are significantly less than attempting the same solution with an on-premise or other cloud based software implementation.

Service Components

- **Contract Data Conversion** - We will do all of the heavy lifting when it comes to migrating all of your data to Contract Guardian.
- **Implementation** - Our support team is committed to holding your hand throughout the entire implementation process to make sure that you are up and running on Contract Guardian as quickly and smoothly as possible.
- **Configuration** - Contract Guardian is configured to match your needs for today and can be changed tomorrow.
- **Training** - Contract Guardian's training offerings are designed to expedite your use of the contract management system and maximize your investment. Training sessions are available for all of our customers. We provide training that will guide new users, experienced users that need a little refresher as well as advanced users looking to address some more complex situations.
- **Support** – We are recognized as the leading support organization for hosted contract management in the industry combining global experience with local firm service.
- **Custom Development Services** - Contract Guardian offers enormous flexibility and can fit almost any industry. However, you may have some special needs. Our contract management development team has rock-solid skills and expertise in building enterprise solutions of a range of complexity levels
